## Work hard, stay healthy.

Soreness and numbness in the hand can be caused by use of computer mouse.  
Carpio reduces your wrist fatigue.

Allmost 2 billion computer mouse users are at risk.

## Truly ergonomic

### Designed with physicians

- Reinforced pressure to the thenar and hypothenar part of the palm
- Glides with your mouse to enable the movement from the whole arm

Standard wrist rests don't provide any significant ergonomic benefit and usually increase the risk by applying the pressure to the underside of the wrist and compressing the tissues.

Carpio was carefully designed (by physicians) to reinforce the pressure from the wrist to the palm (thenar and hypothenar part). It improves arm position by lifting the wrist for 1.2 cm and reduces the harmful extension.

### It moves freely

Carpio does not hinder the user. It moves freely with the hand and it doesn't cause additional stress for the wrist.

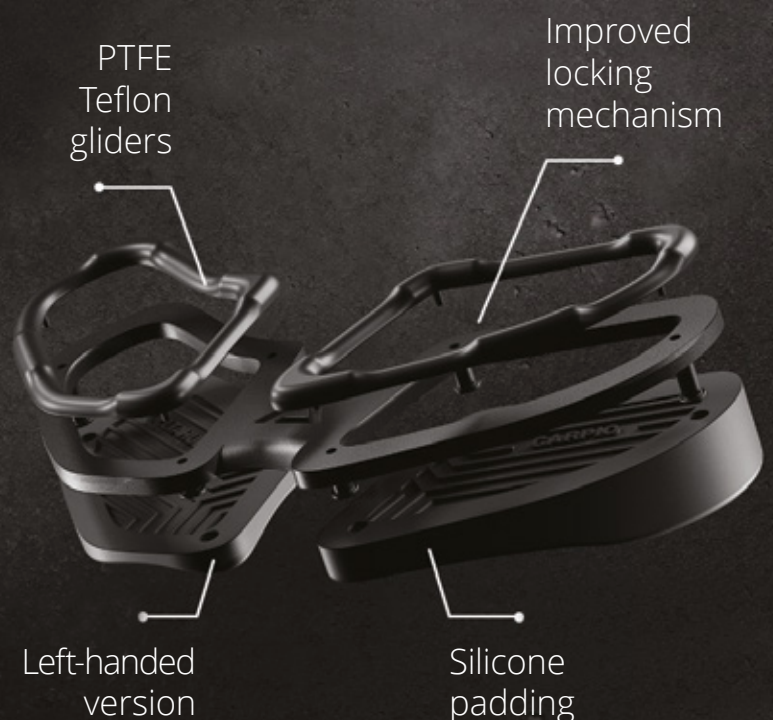

## Quality materials

### New features

Thanks to the feedback from more than 20.000 customers, we've made Carpio 2.0 even better.

ABS base, silicone ergonomic pads and PTFE Teflon feet ensure optimal functionality of the product. Product is designed in Europe and suitable for every computer mouse.

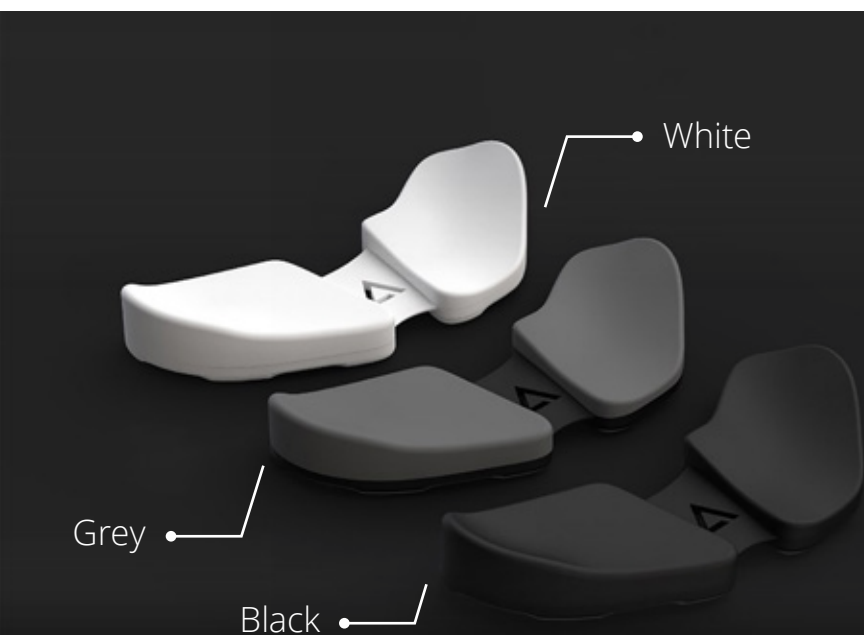

## Take it anywhere

- Fits in your pocket
- Lightner than your favourite pen

## Packaging

Box dim.: 11,50 cm x 7,5 cm x 2,8 cm; 81g
